How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How do I plan a solar power installation?

Planning a solar power installation starts with careful assessment and selecting suitable equipment and location. These steps set the foundation for a reliable and efficient solar energy system. I begin by calculating daily energy consumption using utility bills and appliance ratings.

What are the steps in a residential solar installation process?
