Once you unpack your modules, check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module. A protected copy of the ...

To prevent the panels from falling while removing them from the pallet, move the whole pallet next to a wall or other firm support structure, as shown below. Cut off all remaining straps and remove any ...

To ensure the safety of unloading of PV modules, please read this manual carefully. In the process of unloading, the forklift should be selected reasonably according to the size and weight of the goods.

Uneven surfaces increase the risk of tipping or dropping the load during unloading. The platform should have a non-slip surface (e.g., textured steel or rubber mats) to prevent accidents caused by slipping ...

In order to prevent the safety of placing and unpacking modules affected by tilt and uneven ground, please choose flat ground when unloading.

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box.

It's best to stage the pallets in a flat, open and dry location when unpacking them, and position the pallets next to a solid, self-standing support structure, such as a tracker post or wall, ...

Proper photovoltaic panel unpacking requirements and specifications aren't just red tape; they're the difference between a 25-year energy workhorse and an expensive glass paperweight. This guide will ...

It's best to stage the pallets in a flat, open and dry location when unpacking, and position the pallets next to a solid, self-standing support structure, such as a tracker post or wall -- the taller ...

Why don t you chamfer the photovoltaic panels when unpacking them

(11) Do not allow the modules to come in contact with sharp-pointed objectives to prevent them from scratches, avoiding a direct impact on the safety of modules.
