Picture a crisp morning in Windhoek, the sun climbing over the vast Namib dunes--and then the news drops: on September 29, 2025, RWE AG decided to walk away from its non-binding offtake MoU with ...

Enter the CGN Windhoek Energy Storage Project, Namibia's bold answer to energy instability. This lithium-ion battery marvel - think of it as a "gigantic phone charger for cities" - is set to store 100MWh ...

Namibia's green hydrogen initiative has garnered international attention. The country plans to use solar and wind power to produce green hydrogen, a clean energy source that can fuel industries and ...

Hydroelectric power (HEP) accounted for the bulk of this, namely utility Namibia Power Corporation (Nampower)'s 374MW Ruacana plant. Windhoek aims to add 428MW of solar PV capacity to ...

Namibia is evolving from a centralized model dominated by one large utility, NamPower, to a hybrid decentralized model with multiple actors generating and supplying electricity.

This article explores Namibia's growing renewable energy sector, the role of solar and wind power in the country's energy future, and the various projects that are helping to position Namibia as a leader in ...

Mobile energy storage isn't just coming to Windhoek townships - it's already rewriting the rules of energy access. And that's something every resident can plug into.

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, opportunities, and policy implications.

Windhoek shuts down solar container communication station and wind and solar hybrid

The City of Windhoek has confirmed to Network Media Hub that its planned megawatt solar PV project has been delayed for nearly two years, with the procurement process still under review at the CEO's ...
